Why Choose Us?

- Our multi-configurational modular support can be customized to fit your specific requirements, providing reliable stability and flexibility for every installation
- Efficient systems are delivered swiftly, ensuring you get the support you need when you need it most
- Aluminum construction eliminates the need for galvanizing reducing environmental impact
- Elimination of the requirement for on-site welding, manual fabrication, and excessive handling decreases work related injuries
- Cutting-edge Vectis equipment provides a consistent, reliable product with uniform Cobot welds.
- Tie-downs, cross-bracing, and modular anchoring components help meet regional building codes

Patent Pending – U.S. Application No. 19/174,074
